

W. P. A. Bibliography Digs Up The Facts

Negro's Part in American Labor Scene Treated in Fifty-eight Studies.

WASHINGTON, D. C., Nov. 9.—More than fifty books, pamphlets and reports on the relation of the Negro to America's shifting industrial scene are included in an extensive bibliography on "Industrial Change and Employment Opportunity," just issued by the Work Projects Administration.

Among the notable Negro authors whose studies on the impact of industrial change upon employment within the race are listed in the bibliography are Lorenzo J. Greene, Abram L. Harris, George E. Haynes, T. Arnold Hill, Charles S. Johnson, Emmett J. Scott and Carer, G. Woodson.

The publications listed in the WPA bibliography under "Negro Labor," range from "The Negro in the slaughtering and meat packing industry in Chicago," by Al-

ma Herbst, to "The Negro as a Capitalist." The latter is a study of banking and business among American Negroes written by Abram L. Harris and published by the American Academy of Political and Social Science.

Of current significance is a study by Emmett J. Scott concerned with population movements among Negroes during the last World's War. The title of this publication is "Negro Migration During the War." The WPA bibliography lists Dr. Scott's production as a 188-page publication issued under the Carnegie Endowment for International Peace. This study appeared after Dr. Scott served as special assistant to the Secretary of War. "The Mobility of the Negro," by Edward E. Lewis, of the Howard university teach staff is a later study of Negro migrants. This publication, also listed in the bibliography, shows the relation of the Negro to the American labor supply.

Many phases of today's international events are touched upon in Charles S. Johnson's monograph on "The Substitution of Negro Labor for European Immigrant Labor." This work shares interest with other studies in the same field by Dr. Scott, T. J. Woofer Jr., Dean Dutcher, Herman Feldman, Louise Venable Kennedy, and Carter G. Woodson, all of which are listed in the bibliography.
